

**Effect of seedling stock on the early stand development and physiology of improved Loblolly pine (*Pinus taeda* L.) seedlings**

iForest – Biogeosciences and Forestry – doi: [10.3832/ifor1725-009](https://doi.org/10.3832/ifor1725-009)

**Supplementary material**

**Fig. S1** - Mean ( $\pm$  standard error) leaf water potential by genotype by month in 2013. Means followed by a different letter indicate significant differences in each month using least squares means test ( $\alpha = 0.05$ ).
