Cheng D, Zhang Z, Zhou S, Peng Y, Zhang L (2019). **Relationships between leaf physiognomy and sensitivity of photosynthetic processes to freezing for subtropical evergreen woody plants** iForest – Biogeosciences and Forestry – doi: 10.3832/ifor3196-012

Supplementary Material

Fig. S1 - Michelia odora under freezing (left) and recovery conditions (right). The leaves developed

obvious necrotic areas (red circles) after freezing.
